# hero: eyebrow: USER GUIDE title: Configure

---

## Purpose

Set gateway or direct Relay URLs, project id, TLS insecure, tokens. Probe backends. Reopen setup guide from here.

## When to use it

- Open **Configure** when the job matches this screen
- Prefer the product home / Get started panel if you are unsure where to begin
- Confirm health and auth tokens if probes fail

## How to get there

- UI path: `/ui/` → **Configure** (or matching nav tab)
- Spotlight / in-app links when available

## Operate from the console (UX)

1. Open the relay-edge UI ( `/ui/` ) on `https://<host>:...` (see Admin basics for the default port).
2. Navigate to **Configure**.
3. Complete the on-screen fields / actions for this surface (Set gateway or direct Relay URLs, project id, TLS insecure, tokens. Probe backends. Reopen setup guide from here.).
4. Use **Probe** / **Save** / **Send** (or the primary button on the page) and watch status chips.
5. **Empty / fail:** Check Admin basics env vars, JWT/ `API_TOKEN` , TLS insecure for lab certs, and backend reachability.
6. **Success:** Status shows healthy / accepted; related Lab or Logs surfaces reflect the change.

Never publish lab IPs — use `<host>` .

# hero: eyebrow: USER GUIDE title: Docs

---

## Purpose

Embedded verification notes and link back to first-time setup on `/ui/`.

## When to use it

- Open **Docs** when the job matches this screen
- Prefer the product home / Get started panel if you are unsure where to begin
- Confirm health and auth tokens if probes fail

## How to get there

- UI path: `/ui/` → **Docs** (or matching nav tab)
- Spotlight / in-app links when available

## Operate from the console (UX)

1. Open the relay-edge UI ( `/ui/` ) on `https://<host>:...` (see Admin basics for the default port).
2. Navigate to **Docs**.
3. Complete the on-screen fields / actions for this surface (Embedded verification notes and link back to first-time setup on `/ui/` ).
4. Use **Probe** / **Save** / **Send** (or the primary button on the page) and watch status chips.
5. **Empty / fail**: Check Admin basics env vars, JWT/ `API_TOKEN` , TLS insecure for lab certs, and backend reachability.
6. **Success**: Status shows healthy / accepted; related Lab or Logs surfaces reflect the change.

Never publish lab IPs — use `<host>` .

# hero: eyebrow: USER GUIDE title: Firewater

---

## Purpose

Seed plant inventory, enable Publish into Relay, run scenarios (lowtank, fire, comms, vision, gas).

## When to use it

- Open **Firewater** when the job matches this screen
- Prefer the product home / Get started panel if you are unsure where to begin
- Confirm health and auth tokens if probes fail

## How to get there

- UI path: `/ui/` → **Firewater** (or matching nav tab)
- Spotlight / in-app links when available

## Operate from the console (UX)

1. Open the relay-edge UI ( `/ui/` ) on `https://<host>:...` (see Admin basics for the default port).
2. Navigate to **Firewater**.
3. Complete the on-screen fields / actions for this surface (Seed plant inventory, enable Publish into Relay, run scenarios (lowtank, fire, comms, vision, gas).).
4. Use **Probe** / **Save** / **Send** (or the primary button on the page) and watch status chips.
5. **Empty / fail**: Check Admin basics env vars, JWT/ `API_TOKEN` , TLS insecure for lab certs, and backend reachability.
6. **Success**: Status shows healthy / accepted; related Lab or Logs surfaces reflect the change.

Never publish lab IPs — use `<host>` .

# hero: eyebrow: USER GUIDE title: Fleet

---

## Purpose

Multi-class IoT scenarios: blackout, amr\_lost, ot\_storm, spill, heatwave, intrusion.

## When to use it

- Open **Fleet** when the job matches this screen
- Prefer the product home / Get started panel if you are unsure where to begin
- Confirm health and auth tokens if probes fail

## How to get there

- UI path: `/ui/` → **Fleet** (or matching nav tab)
- Spotlight / in-app links when available

## Operate from the console (UX)

1. Open the relay-edge UI ( `/ui/` ) on `https://<host>:...` (see Admin basics for the default port).
2. Navigate to **Fleet**.
3. Complete the on-screen fields / actions for this surface (Multi-class IoT scenarios: blackout, amr\_lost, ot\_storm, spill, heatwave, intrusion.).
4. Use **Probe** / **Save** / **Send** (or the primary button on the page) and watch status chips.
5. **Empty / fail**: Check Admin basics env vars, JWT/ `API_TOKEN` , TLS insecure for lab certs, and backend reachability.
6. **Success**: Status shows healthy / accepted; related Lab or Logs surfaces reflect the change.

Never publish lab IPs — use `<host>` .

# hero: eyebrow: USER GUIDE title: Self-test lab

---

## Purpose

Steps: Health, Store, Send, Receive, then firewater / remote-edge / fleet shortcuts.

## When to use it

- Open **Self-test lab** when the job matches this screen
- Prefer the product home / Get started panel if you are unsure where to begin
- Confirm health and auth tokens if probes fail

## How to get there

- UI path: `/ui/` → **Self-test lab** (or matching nav tab)
- Spotlight / in-app links when available

## Operate from the console (UX)

1. Open the relay-edge UI ( `/ui/` ) on `https://<host>:...` (see Admin basics for the default port).
2. Navigate to **Self-test lab**.
3. Complete the on-screen fields / actions for this surface (Steps: Health, Store, Send, Receive, then firewater / remote-edge / fleet shortcuts.).
4. Use **Probe** / **Save** / **Send** (or the primary button on the page) and watch status chips.
5. **Empty / fail**: Check Admin basics env vars, JWT/ `API_TOKEN` , TLS insecure for lab certs, and backend reachability.
6. **Success**: Status shows healthy / accepted; related Lab or Logs surfaces reflect the change.

Never publish lab IPs — use `<host>` .
